

Companies all over the world face challenges posed by growing technological complexity and an insistence from end-users that applications must function 24/7 with zero failure. This places testing teams under intense pressure to test applications speedily and thoroughly before final release.

Independent testing services from PCCW Solutions facilitate cost reductions and faster time-to-market, while pursuing a philosophy of continuous improvement in quality and customer satisfaction. The company has attained industry standards such as CMMI Level 5 and ISO 9001 to ensure a premium quality approach and result.

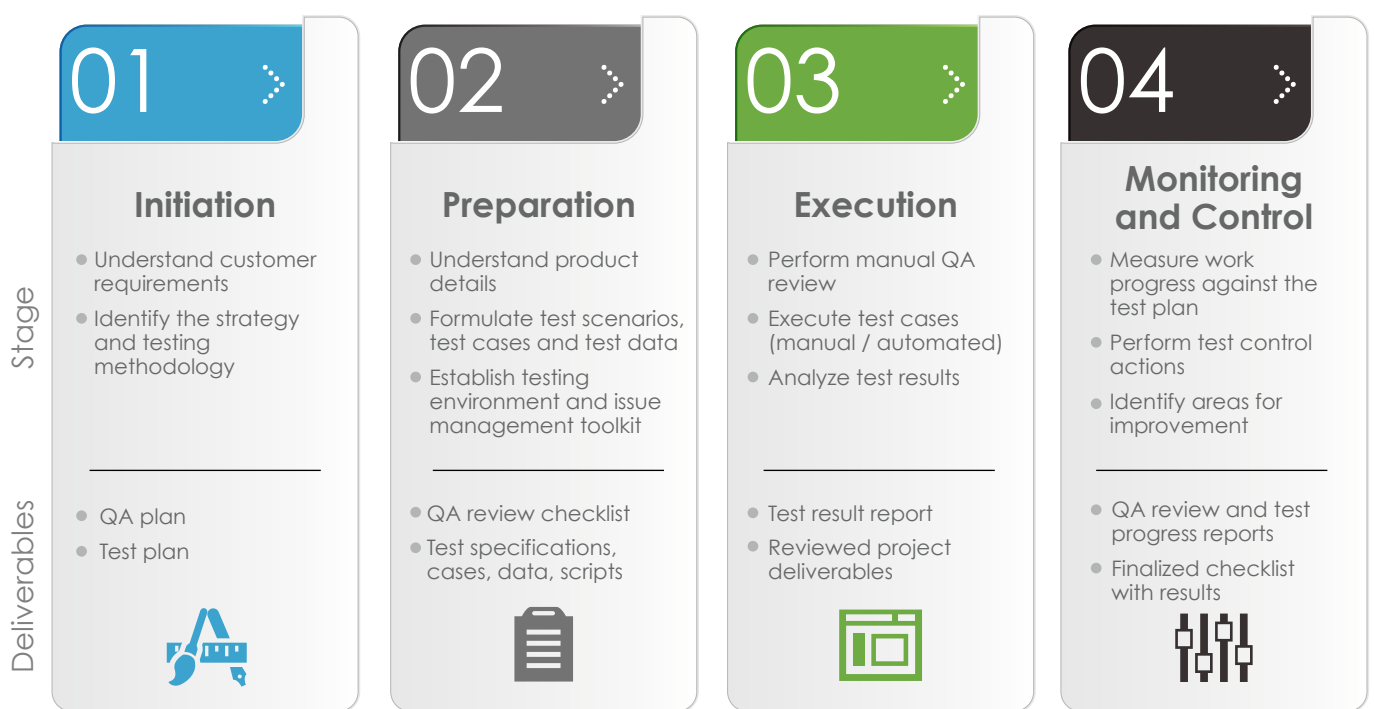

Testing Workflow and Deliverables

PCCW Solutions believes testing is an integral part of the software development process in accordance with the following guiding principles, which seek to:

- Control and improve the quality of software continuously
- Prevent, detect and correct quality problems as early as possible
- Integrate testing activities into software development life cycle
- Adapt the testing methods based on the needs and nature of software
- Communicate with all stakeholders in a clear and timely manner

A well-defined testing workflow governs each project, giving rise to clear documentation of deliverables against each methodology component and testing stage.

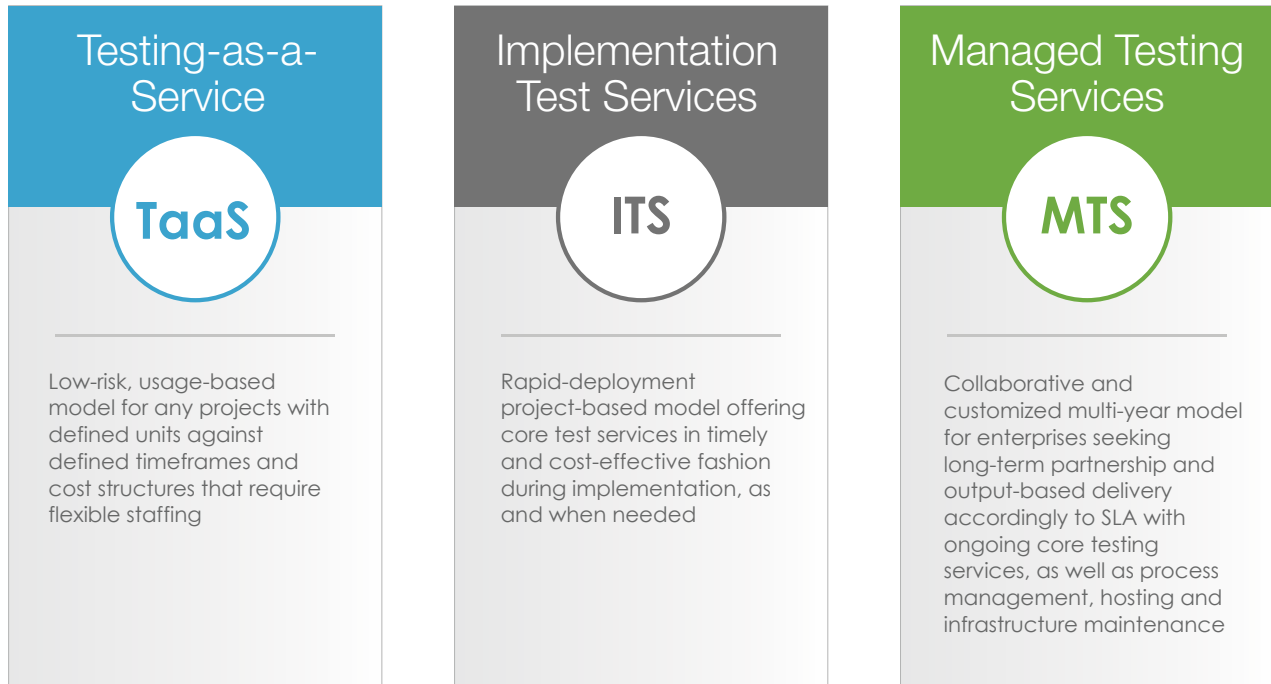

Services Offerings

PCCW Solutions initiates testing coverage from back-end to front-end across multiple platforms. We bring a broad range of expertise and skill sets to bear in adapting the testing approach to satisfy unique project requirements.

Testing Consultancy	Specialized Testing Services	Testing Automation

Engagement Models

Customers can adopt a flexible value-based pricing approach in order to choose from a menu of service models according to project scope, timeframe and strategic initiatives.

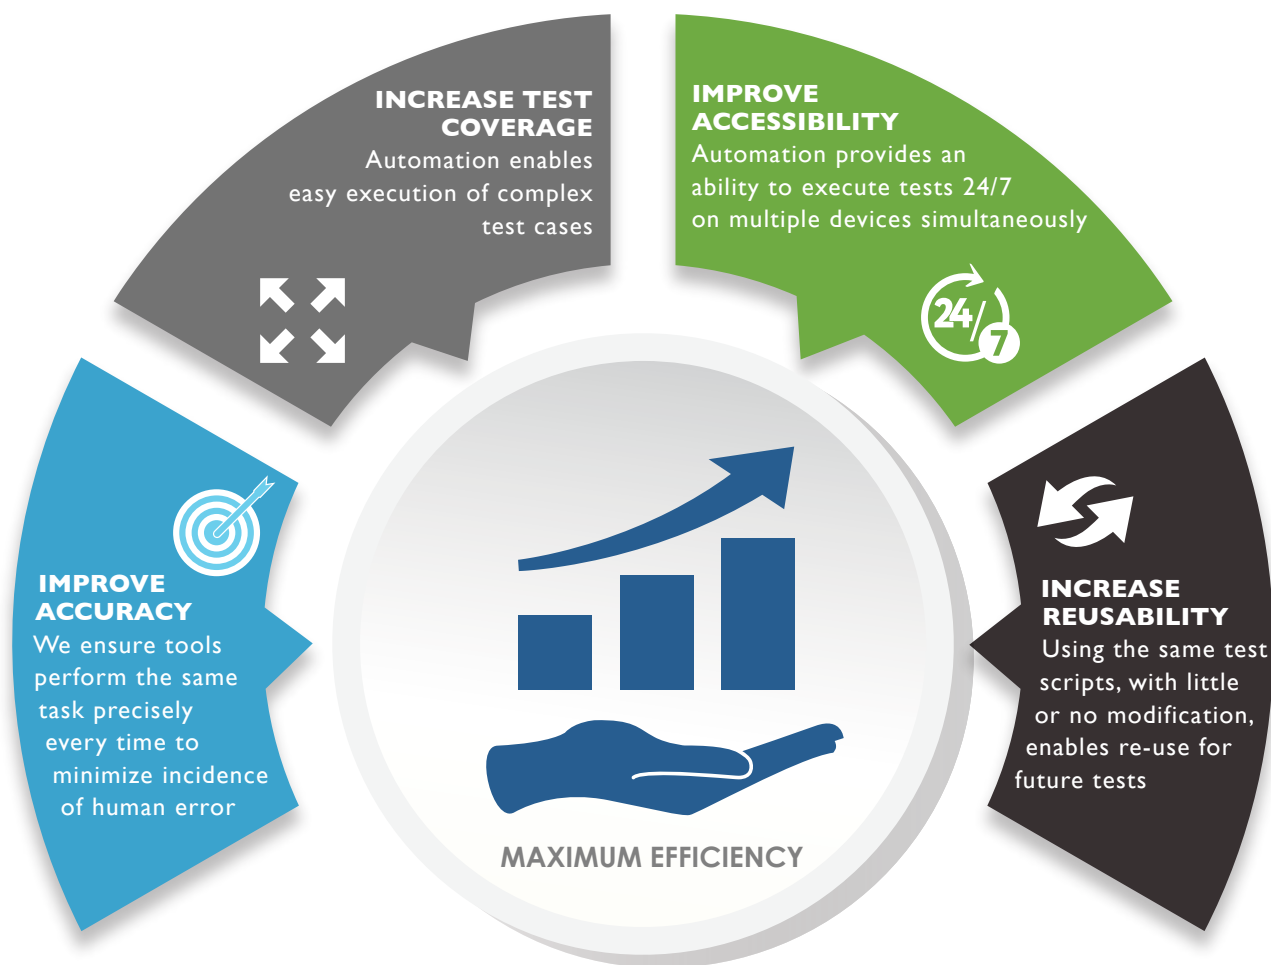

Features and Benefits

PCCW Solutions customizes features of commercial off-the-shelf (COTS) testing tools and other resources to suit customer requirements and industry-specific needs.

- **Reduced Testing Cycle Time**
Increase testing productivity with proper test plan and automation tools
- **Flexibility and Cost-Effectiveness**
You can focus on your core business by outsourcing testing activities
- **Extensive Technology Expertise**
Dedicated pool of experienced testers equipped with the latest tools to efficiently perform the testing activities
- **Independent Testing**
Our independent standard testing methodology enables us to pledge quality without bias
- **Resolution of Common Challenges**
We comply with requirements and specifications, correctness and completeness of deliverables
- **Continual Improvement**
Best practices and continual improvement methodologies are implemented for project measurement

Testing Automation for Maximum Efficiency

Our seasoned automation expertise and tools help you tackle traditional challenges and deliver immediate ROI:
