# "ePayLink"

*enables eCommerce merchants to accept real-time credit card or PPS debit payments swiftly and securely over the Internet.*

## Flexible payment options

ePayLink supports payment from widely-accepted credit cards including VISA and MasterCard or PPS direct debit service.

## Multi-currency

ePayLink handles multiple currencies including HKD and USD.

## User-friendly monitoring tools

ePayLink provides user-friendly reporting tools that allow merchants to access real-time transaction reports such as detail of transaction and revenue and sales data. Merchants can also export report details to MS Excel for further analysis.

## Secure transaction handling

ePayLink employs world-class encryption technologies - Triple-DES, RSA and SSL to ensure transaction details and credit card information are fully protected.

## Value-added service

ePayLink offers a one-stop shop logistics service that includes warehouse and order management, repackaging and a delivery service to help merchants develop hassle-free eCommerce business.

**MasterCard.**
